Governor Bill Owens
State of Colorado
State Capitol Building

28 NOV 01

Your Excellency;

This is in the nature of a petition for redress of grievance, seeking you to exercise your authority to direct your Colorado State Attorney to initiate an investigation into these criminal charges and to pursue a prosecution against the culpable parties in the following matters;

The nature of the question is in the jurisdiction applicable to these crimes arising from the submission by the Attorney General's Office Special Prosecutor SAAG Marleen M. Langfield (Attorney Register Number 10355) for an Indictment from a State Grand Jury, convened in Denver, which charges were prosecuted in Jefferson County District Court.

The Interest of the State of Colorado is foremost in the integrity of it's legal process. Further, the State has an interest in the professional ethics and conduct of it's Senior Assistant Attorney General in the person of Attorney Langfield. The State has an interest in the perception of it's citizenry of the probity and propriety of it's administration of justice and the protection of their civil rights.

On February 19th, 2001, I was arrested for Seventeen (17) crimes as indicted by a State Grand Jury as prosecuted by your Attorney General, Mr. Salazar and his Senior Assistant Attorney Marleen M. Langfield. The crimes consisted of Sixteen (16) Felonies and one serious Misdemeanor which would indicate a propensity for violence and located on a Jefferson County School Ground. (Indictment 00CR0001)

The Charges have all been dropped as of early October although the Judge's order reached me about three weeks ago. (Dismissal Order of the Court 3 OCT 01)

Of the Sixteen Felonies, totaling over 5 decades of prison time in hazard, I was not ever mentioned, anywhere in the Indictment, in Fifteen of them, nor in the report of the charged Misdemeanor. The charges were laid against me by SAAG Langfield fullknowing that they were without substance. Knowing that I had never been accused, no testimony taken which named me as having any involvement or culpability in any of the Felonies charged.

In reading the transcript and reports of interviews, it comes to my attention that the Grand Jury was presented gross and malicious and pernicious material perjury by Victoria de Thouars-Tollman, Hector Bonilla, and Arabella T. Bonilla.

I am prepared to prove this in a court of law by irrefutable evidence; 3rd Party eyewitness, logged documentation, video record, postmarked mailing and so on.

I have approached the Colorado State Attorney General's Office to prefer criminal charges against these people and been rebuffed. SAAG Langfield's 'boss' (as identified on telephone- an unintelligible surname) informed me that it isn't within the legislatively described parameters of the Attorney General's scope of jurisdiction. He referred me to the Denver District Attorney's Office as the Grand Jury had convened in Denver District.

I spoke at length with Dep. Dist. Att'y V. Pedrotti who consulted with Assistant District Att'y Phil Parrott and delivered the opinion that it is a matter for the Attorney General's Office, as the AG's Office simply uses Denver's physical plant for the seating of a Grand Jury, the State Attorney General's Office retaining jurisdiction over criminal perjury in that instant circumstance.

Assistant District Attorney Parrott invites your discussion at your leisure.

I approached the Jefferson County District Attorney's Office to prefer these charges on the theory that the Arrest Warrant, Arrest, Incarceration, Arraignment, Bonding, Court Appearances and Dismissal were supervised by their office and their jurisdiction would apply. They opine that the jurisdiction was retained by your Attorney General's Office as well.

Of course, your Attorney General's name, Mr. Salazar, is senior on the Indictment (00CR0001) and I would hope that you would move forward on an investigation of the entire situation with the expectation of being advised of my rights to prefer criminal charges against these people who have victimized me, destroyed my business and personal reputation, damaged my relationship with my long-time companion and Mother to my children, as well as my children themselves.

Investigators Don Estep and Gary Clyman, working in your name and at the direction of SAAG Langfield, demanded secret access passwords and codes for my computer access; specifying particularly those necessary for remote access. I gave them, as an option to a ransacking of my home and 'vigorous prosecution', 'as strong as I can bring it'. In addition to any investigatory applications that might have been justified, the access and passwords were used to destroy my business websites, credit card authorization, eBay Auction account and other sorts of web-business access/accounts. The computer criminals destroyed the content of the pages, changed the access password, and withdrew from the site. That denies access to anyone who doesn't know the new password- that being the owner, me.

The password that I use is six digits; four letters, only one of which is a vowel; a type ornament, and a numeral. It is case sensitive and the odds of decrypting it are utterly astronomical. The only persons in possession of my passwords, and with remote access to both my computer and my webpresence, were Investigators Estep and Clyman reporting to Senior Assistant Att'y General Langfield.

They extorted my compliance by reserving that they knew that the bulk of the charges against me were unfounded and everybody knew it but me, as the Indictment was 'sealed'. They committed Computer Crime by destroying Exculpatory Evidence stored as data on the web, political speech to which my sites were linked, a commercial site not even owned by me (American Magnetic Media, Inc.), my leathercraft business, my martial arts video business, my antiques appraisal business, my martial arts seminars business, my publishing business, my access to auction goods on eBay, and personal and professional data and contacts that are irreplaceable and were precious to me.

It is irrefutable, Governor Owens, that this situation commands an investigation. I hope your concern with the charges that are filed under your authority will give some good impetus to a desire to clear the matter and to determine any failure by your subordinates to rise to your own standard of professional performance and ethical compass.

Very Respectfully submitted,

Charles H. Clements
